

# We're not sure which **Dynamics 365 ERP application**

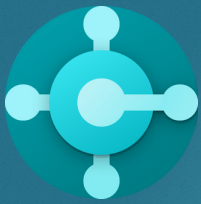

...will work best for us

This is a common question asked by many businesses

## Microsoft Dynamics 365 Business Central (BC)

## Microsoft Dynamics Finance & Supply Chain Management (F&SCM)

*Designed as a mid-market ERP solution, Microsoft Dynamics 365 Business Central caters to the needs of small & mid-sized businesses keen to scale & grow*

*Microsoft Dynamics Finance and Supply Chain Management (F&SCM) is an enterprise ERP solution tailored for larger organisations or businesses with more complex needs*

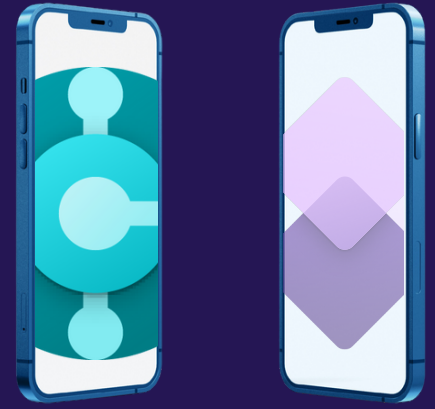

*The flexibility of this solution is one of its greatest strengths, as it allows your business to commence with as little as one user license, giving you the opportunity to gradually increase your user base in line with business requirements*

*Unlike D365 BC, D365 F&SCM requires a minimum of 20 full user licenses to deploy, reflecting its design to accommodate extensive enterprise-level functionalities*

# Business Central is fast to implement and easy to configure

Simplicity guides innovations in product design, development, implementation, and usability. Its customisable and supports even highly specialised industries and business growth.

It's more lightweight, highly adaptable, and powerful with its rich features and is complimented as well by a lower cost to implement than Microsoft Dynamics Finance and Supply Chain Management ERP solution.

**The implementation of F&SCM can cost anything up to 3-4 times more than BC easily, owing to its advanced and robust features and functionality designed for larger or more complex organisations.**

**To put it into perspective, the implementation of D365 F&SCM could cost approximately 5-7 times more than BC, owing to its advanced & robust features designed for larger or more complex operations**

However, it's crucial to note that the core modules are largely consistent across both applications.

That being said, D365 F&SCM does boast additional advanced features, offering further customization and control for complex operations.

Configuration is another aspect where D365 BC and F&SCM diverge. While both offer comprehensive solutions, the configuration of D365 BC is generally easier and more straightforward than D365 F&SCM.

In terms of industry suitability, Microsoft Dynamics 365 Business Central works exceptionally well for manufacturing, distribution, and professional services organisation. Finance and Supply Chain Management is designed to handle more complex manufacturing and supply chain processes.
